ELECTRONIC CHROME & GRINDING  
9132 DICE  
SANTA FE SPRINGS, CA 90670  
ATTN: ENVIRONMENTAL COORDINATOR

Dear Business Owner/Operator:

Your facility located at 9132 DICE in the City of Santa Fe Springs has been identified as a facility that treats hazardous waste under the tiered permitting provision of California Health and Safety Code (CHSC) Section 25200 et. seq. One provision of the law requires that ancillary equipment of tanks or containers in which hazardous waste is treated must be provided with secondary containment. CHSC Sections 25201.5(e) and 25200.3(c)(4)(A) allow ancillary equipment to be utilized in the process without secondary containment provided the equipment is tested and certified every year pursuant to Section 66265.191 of Title 22 of the California Code of Regulations (CCR).

If your business currently operates a waste treatment unit and has equipment, tanks, or sumps which contain hazardous wastes without secondary containment (including flow through clarifiers) you will be asked to provide documentation that your treatment unit meets the aforementioned requirements on your next inspection (please note that this requirement does not apply to clarifiers or other flow through systems which only process industrial waste materials). If this testing has not been completed, please contact Richard Kallman of this office to discuss an implementation plan or your alternatives for compliance. Failure to meet this requirement is a violation of the California Health and Safety Code and may result in fines or other penalties.

If you have questions regarding this letter, please contact Richard Kallman at 562-944-9713.

Respectfully,

Neal Welland  
Fire Chief
